

# COMPOSITE

**COMPOSITE: FINISH LINE'S FLAGSHIP PLASTIC BLEND** – Boasting optimal grip and durability, Finish Line's **COMPOSITE** blend plastic combines the same polymers used in **FORGED** plastic with an additional polymer providing added grip without sacrificing any of the durability and consistency found in our other plastics.

**FORGED: CHAMPION-GRADE DISC GOLF PLASTIC** – Finish Line's **FORGED** Plastic combines a number of premium polymers to forge a plastic with next-level durability, consistency, and beauty. Designed to withstand the most extreme levels of use, **FORGED** blend plastic is an optimal choice for every player.

**GIRO: BASELINE PLASTIC IN A PREMIUM PACKAGE** – We know an F1 car is nothing without its tires and a great disc golfer is nothing without their putters. That's why Finish Line developed **GIRO**, a premium-grade baseline plastic. **GIRO** comes in four blends named for the race tires that inspired them: **GIRO C1** (Firm), **GIRO C2** (Medium), **GIRO C3** (Soft), and **GIRO C4** (Super-Soft).
